Overexertion / Improper Lifting Slips, Trips and Falls

IMCOM
SOLDIERS • FAMILIES • CIVILIANS

OVEREXERTION / IMPROPER LIFTING

How injuries can occur

- working from and awkward position.
- excessively bending or twisting your wrists.
- bending from the waist or twisting your body when lifting or carrying objects.
- lifting with your back instead of your legs.

How to prevent injuries

- try to vary your tasks and motions.
- take short breaks when you are performing the same task repeatedly.
- always use correct posture. Don't slouch, bend from the waist to pick up and object, or work from and awkward position.

IMCOM
SOLDIERS • FAMILIES • CIVILIANS

OVEREXERTION / IMPROPER LIFTING

How to lift properly

- Bend the knees to a full squat or lunge position.
- Bring the load towards your chest.
- Lift now from the legs to the standing position.

It is easy to **prevent overexertion at work** if you just take the time to stop and think before you complete the task at hand. Taking five minutes is worth it if it helps to prevent unnecessary injuries.

IMCOM
SOLDIERS • FAMILIES • CIVILIANS

SLIPS, TRIPS AND FALLS

- **Your Highest Risk workplace Hazard**

- **3 KEYS TO AVOIDING**

- Change the **SURFACE** – (Clear leaves, snow, clean spills)
 - Change your **SHOES**
 - Change your **WALK**
- **Be Situationally Aware: Check Surface Conditions, Slow Down, Focus on Walking**
 - **Brace yourself when possible – Use Railings, Doors, Car handles, etc.**
 - **Don't carry objects that distract/limit your walking**
 - **ASK FOR HELP!**

Carbon Monoxide (CO) Hazards

CARBON MONOXIDE HAZARDS

- ☠ **CO is a lethal poison that is produced when fuels such as gasoline/diesel are burned.**
- ☠ **CO is colorless, tasteless, odorless, and nonirritating, it can overcome the exposed person without warning.**
- ☠ **CO produces weakness and confusion, depriving the person of the ability to seek safety.**

CARBON MONOXIDE HAZARDS

☠ Learn to recognize the signs and symptoms of CO overexposure:

- Headache.
- Nausea.
- Weakness.
- Dizziness.
- Visual disturbances.
- Changes in personality.
- Loss of consciousness.

☠ Any of these signs and symptoms can occur within minutes after the equipment is turned on.

CARBON MONOXIDE HAZARDS

☠ Employers Should:

- ☠ Conduct a workplace survey to identify all potential sources of CO exposure.**
- ☠ Educate workers about the sources of CO.**
- ☠ Always substitute less hazardous equipment if possible.**

CARBON MONOXIDE HAZARDS

- ☠ Operating gasoline powered engines in buildings or partially enclosed areas increases carbon monoxide exposure.**
- ☠ Direct the exhaust outside and away from air intakes.**
- ☠ Use tools powered by electricity or compressed air indoors.**
- ☠ If compressed air is used, place the gasoline-powered compressor outdoors away from air intakes.**

IMCOM

CARBON MONOXIDE HAZARDS

Prevention

- ✓ Avoid the use of **unvented heaters** and charcoal grills in closed areas.
- ✓ Never operate engines in a closed garage without exhaust ventilation.
- ✓ If in doubt as to the heating system, open a window for ventilation.
- ✓ Have your furnace checked by a professional.
- ✓ **Install a carbon monoxide detector.**
- ✓ **Be Situational Aware of CO Sources.**

UNEXPLODED ORDNANCE (UXO)

What are UXO?

- UXO stands for **U**ne**X**ploded **O**rdnance.
- Ordnance refers to:
 - tanks, helicopters, and ammunition
- Unexploded ordnance includes ammunition and explosives such as:
 - bullets, grenades, mines, bombs
 - missiles and explosive devices

And more...

UNEXPLODED ORDNANCE (UXO)

Some UXO are hard to identify

- **UXO comes in many shapes, sizes, and types.**
 - Flares, simulators, and blasting caps look harmless, but they are all dangerous.
 - Don't be fooled by the word "simulator."
 - Size and age doesn't matter.
 - Small items can injure or kill.
 - Old war souvenirs can be dangerous.

Fort Campbell's vision is to be "A Class Army Home."

Fort Campbell is locally located on the TN/KY border, the 106,000 acre installation possesses a unique capability to deploy mission-ready forces by air, rail, highway, and inland waterway.

Fort Campbell is proud to be the home of the only Air Assault Division in the world, the 101st Airborne Division (Air Assault). We are also the home of two prestigious Special Operations Command units, the 5th Special Forces Group (Airborne) and the 160th Special Operations Aviation Regiment (Airborne). Additionally, we are the home to the 86th Combat Support Hospital, the 716th MP Battalion, and sizable Medical and Dental activities. We provide training and mobilization support for numerous Army National Guard and Army Reserve units. Fort Campbell is an Army installation that supports active and reserve component units, Army civilians, Army Families, retirees and veterans.

As home to the Army's most-deployed contingency forces, we continuously refine our efforts to support expeditionary forces by providing effective, efficient and sustainable services that
